# PowerMax Express

## Enjoy total peace of mind wherever you are

The PowerMax Express home security system provides the benchmark for the professional security industry.

When installed by a professional engineer it provides simple day to day operation and can be easily upgraded with useful accessories.

It has the added benefit of using the mobile communication network so no fixed telephone line is necessary.

The system is approved to EN5013-1 Grade 2 which is recognised by the police and insurance companies.

### Everyday benefits of the PowerMax Express:

#### Wireless technology

- Pioneering wireless technology links the control panel and all accessories.
- No wires - no mess, the system can be quickly and easily installed with minimal disruption to your home.
- The system can be easily upgraded in the future if required.

#### Protecting your family

- Set your PowerMax to message you when your children arrive home.
- Portable panic and emergency buttons give you extra security whilst anywhere in the house or garden.
- Arm the system using the home set mode for added security at night.

#### Pet tolerant

- Allows your pets to move freely in all areas enabling you to protect rooms that could not be covered by standard sensors.
- Even animals over 38Kg (85lb) can be covered by using a combination of optional accessories.

#### Monitoring

- Alarm signals can be sent directly to a 24 hour monitoring centre for guarded or police response. For added protection there is the option to automatically check the connection to the monitoring centre periodically and alert them in the event of a problem.

Please note, this is an optional extra you may need to discuss with your installer.

#### Be connected

- Set the system to send you, and up to three other people, an SMS with important notifications like alarm events and system information.
- Be able to arm, disarm and check the status of your system by sending it a simple, secure SMS message. You'll receive a reply to confirm.

## How the PowerMax Express works in your home

## Frequently Asked Questions

### Q. How long does it take to install?

A. The PowerMax system is pre-configured away from your home and so can be installed in just a couple of hours.

### Q. What do I need to use Powermax Express?

A. PowerMax comes with everything you need and you will be shown how to operate your new system day to day.

### Q. Will there be any mess?

A. As the system is wireless there will be virtually no mess and no need to run wires around your home even to the telephone line.

### Q. What happens if I move home?

A. Your system can move home with you although it will need to be professionally installed in your new property. However, the system will also be an additional selling point if you decide to leave it behind or the new owner may wish to purchase it from you.

### Q. What happens if I have an issue or question at a later date?

A. Your PowerMax installer will be able to help with any future problems which may arise. Ask your installer about service contracts which for a low fee will ensure your system is maintained and runs perfectly for years.

### Q. What if I go on holiday?

A. Simply arm the system when you leave your home. In the event of an incident you will be sent an SMS to which you can reply to check the status of the system and control it remotely. If friends or neighbours need to enter your home leave them a keyfob or code and show them how to use the system.

### Q. Why choose Visonic?

A. Visonic are a global leader in the commercial and domestic security sector and are recognised as a brand delivering quality products and solutions.

# Customise your PowerMax Express

Optional extras to upgrade your system

Extra protection for your home:

#### Co Detector

Alerts you of harmful Carbon Monoxide emissions.

#### Smoke Detector

Added peace of mind for fire prevention and smoke damage.

#### Flood Sensor

Gives early warning of potential water damage in flood risk areas of your home.

#### Glass Break Sensor

Added security in the event of windows or glass doors being smashed.

#### Shock Sensor

Gives early warning of intruders trying to access external windows and doors.

Additional security and control over your system:

#### Wireless Siren

Visual deterrent and audible alert outside your home for improved security.

#### Internal Siren

For additional audible deterrent inside the home & out buildings i.e. garage, workshop etc.

#### External Motion Sensor

Reliable, robust, anti vandal, water resistant external security PIR.

#### Transmitter

Wireless waterproof pendant designed for emergency alert applications.

#### Keypad

Remote control for managing your system from anywhere in the home.

Ask your installer about these and more upgrade options.
